

Andhra Pradesh Power Generation Corporation Limited

National Cyber Security Awareness Month- October

Cyber Security Awareness Tips:

Personnel / Information Security

1. Keep your mobile devices secured with strong passwords or biometrics.
 2. Watch out for social engineering — attackers may pretend to be vendors or IT staff.
 3. Always verify requests for money transfers or vendor payments — fraudsters mimic managers.
 4. Keep your work emails professional — don't forward jokes, chain mails, or unknown links.
 5. Stay vigilant on social media — don't reveal official or sensitive information.
 6. **Be alert to “Digital Arrest” scams — There is no such thing as a digital arrest.**
Cybercriminals often pose as police or government officials through calls or video chats, falsely accusing victims of crimes to create panic and demand money or personal details. Stay calm, disconnect immediately, and report such scams at www.cybercrime.gov.in — remember, no genuine authority conducts arrests or investigations online.
